SUMMARY

Experienced **front-end developer** with over four years of dedicated immersion in the IT sector. Passionate about creating seamless user experiences and optimizing performance, I specialize in crafting intuitive interfaces that adapt seamlessly across devices, ensuring an unparalleled user journey. Committed to staying at the forefront of front-end technologies, I consistently integrate the latest advancements into my work to deliver innovative solutions.

EXPERIENCE

Senior Software Development Engineer, DataFlow Group   *Jan 2024 - Present*

- Involve in product discussion to ensure the user cases, implementation gathering and creating the sprint planning for the team.
- Collaborating with the backend team and coming up with a data structure for the complex implementation of flow.
- Implemented the payment gateway using webhooks ensuring a better user experience.
- Taken responsibility for a complete flow of applicants in our portal. Added features like implementing separate stores for each flow, and retaining the values in reload. Also creating the components on the go with just the data types ensures basic validations.
- Dynamic handling of forms which vary based on user as per the requirement.

Skills used: Next 14, Typescript, Jest, Javascript, Express, NodeJs, Storybook, Pnpm, React context, Rollup.

Sr Software Engineer, Monster.com   *Mar 2022 - Dec 2023*

- Improved performance of existing pages by 100% on desktop from 33% to 62%, and 200% from 14% to 57% on mobile resulting in improved SEO rankings and enhanced accessibility.
- Added multilingual support to the application, enabling it to support English, Hindi, and Arabic.
- Developed a single application that works in 7 countries, displaying relevant data and features for each country.
- Integrated LinkedIn and Facebook for single sign-on to our application
- Implemented code quality checks as git pre-commit hooks
- Set code guidelines for the repository and ensure the coworkers abide by them during the development ensuring better code readability.
- Designed a component library for all the teams in the company for common design implementations

Skills used: Vuejs 2, Nextjs 13.5, React 18, React context, Typescript, Javascript, HTML, CSS, Thymeleaf, Webpack, StoryBook

UI Engineer, Tavant   *Jul 2020 - Mar 2022*

- Built landing pages, dashboards, and online applications using frontend frameworks like ReactJS and Angular 4+.
- Trained new hires on web technologies like HTML, CSS, JavaScript, and ReactJS, and provided support to team members on ongoing projects.
- Revamped the organization's website with best practices and SEO optimization, resulting in a performance increase from 21% to 73%.
- Created responsive websites that functioned smoothly on all devices and implemented features like Google Maps, Google reCAPTCHA, and Stripe for payments.
- Contributed to the development of internal organization applications, adding new features and functionality.

Skills used: Reactjs, Angularjs, Nextjs, Javascript, HTML, CSS, Typescript, Redux.

Project Trainee, Tavant   *Sep 2019 - Jul 2020*

- Demonstrated strong attention to detail and commitment to learning during training, taking thorough notes and asking questions to clarify concepts.
- Attended training courses to gain industry knowledge and develop a deeper understanding of processes and techniques.
- Outperformed peers in training, leading to an early opportunity to work on a research project that analyzed the factors impacting application performance and provided solutions using the Chrome lighthouse tool.
- Assisted senior team members in their duties, learning the necessary skills and knowledge to perform all related tasks.
- Demonstrated the ability to complete projects and assignments within tight time constraints, adapting quickly to new materials and processes.

Skills used: Reactjs, Typescript, Javascript, HTML, CSS.
